

Multi-Functional Dispatcher Box 'Control-Ability' in a Box

The policing of large public events and smaller 'local' gatherings place a major responsibility on the professional training and skills of police officers of all ranks. The dispatcher box fulfills many operational roles and more are evolving every day.

MORE OPERATIONAL EXAMPLES

- Locations with poor coverage.
- Locations which are occupied only part time.
- Command and control from a vehicle for surveillance and firearms teams.
- Fast deployment of incident control vehicles.
- Stand by and emergency control.
- Stand by control room sets with dual Plantronics headset.
- High noise environments such as music concerts and racetracks
- Command control buses & other vehicle fleets.
- Stadium control centres.
- Covert control centres in vehicles.
- Mini-control point, when protecting key points for short/medium duration. (e.g. Protection of key buildings at sporting events). The speaker allows more than one person to listen to network activity.

EXCEPTIONAL TACTICAL AGILITY ...

- Its small size and lightweight means it can be removed to a fresh site or new vehicle in seconds.
- Can be left in any location without worries about software

MULTI FUNCTIONAL ABILITY...

- The Box combines small size with multi-functionality including P.T.T., Desktop Speaker, Public and Private Modes and of increasing importance Data Access.
- A host of accessories with the unit makes it an essential asset for the full range of users.

EMMINENT FLEXIBILITY ...

- Use your own existing headsets and antennas and it can offer further exceptional value.
- Fixed or temporary location
- Fixed or temporarily fixed, in vehicle
- Can be carried in a suitcase or rucksack

IMPROVE OPERATIONAL EFFICIENCY

- Set up talk groups before deployment to football ground control rooms. No more setting up 'on arrival'.
- Establish point-to-point dispatcher centres for non-essential radio traffic, and reduce airtime costs over talkgroups.

VOICE AND DATA

- Mobile and interim control room solutions.
- Digital voice recording.
- Dispatcher centre.
- Management of GPS locations of specialist teams 'on the ground', by commanders 'on the ground'.
