

'Fit For Purpose' Accessories

Surveillance

TETRA radio accessories designed specifically for use in the discrete and covert environment.

Boom less in-ear microphone & speaker, which is ideal for close quarter surveillance as they look like iPod earpieces. Inductive wireless loops and earpieces with customised options for additional concealment and comfort. Interchangeable headsets to suite the environment with excellent transmit and receive audio quality. Discrete airtube or GSM mobile phone look alike accessories and wired options with interchangeable earpieces iPod or inductive wireless loop and earpiece.

A. Headsets

- 1) Three wire kit with ability to adapt for use either in wireless mode or with iPod earphones, thus maximising operational flexibility with one piece of equipment. Finger /Barrel PTT. Fits straight into Radio Connector. M-3WFL-TA5.
- 2) In-ear air conduction microphone and speaker headset looking like iPod but with transmit in one ear and receive in the other. Removes need for separate microphone wire; excellent for close-up operations.
- 3) Discreet airtube listen only to connect into Y connector. 1RZ-TA5
- 4) Wireless Earpiece.

B. Other

- 1) Wireless Kit neckloop/brooch.
- 2) Y Connector. M-PTTY3.5SC.
- 3) Black Covert Vest zip/pull over front double front pocket.

C. Push-to-Talk Buttons

- 1) Finger PTT.
- 2) Kidney shaped PTT & microphone with screw connector to attach to Listen Only headset.

C. Motorola Radio Connector (Side)

- 1) RI-4001.
